

Home Page Requirements -WZCoding

Bulleted Points

- OpenMRS mission
- GCI background info blurb
- How-to guide (getting started) **Note: this could be a link as well**
- Current status of GCI
 - Countdown
 - Tasks Completed
 - Leaders (Usernames of Top 20) **Note: is it possible to add tasks completed?**
- Information about tasks **Note: might need API**
 - “Hot” tasks (popular ones)
 - Tasks running out of instances
 - Possible- An area for students to review their experiences with certain tasks
- Links
 - Mentor page
 - GCI website
 - OpenMRS website
 - OpenMRS Talk
 - OpenMRS wiki
 - Telegram chat

Explanation

Mainly I wanted this to be a “landing page” for people of all levels in the competition. The **Title Contents** would be The OpenMRS logo and the GCI logo. The mission would be displayed prominently such that people would see what this community is about, along with some background info about GCI and its relationship with OpenMRS. Below that would be a simple how to guide for beginners (this could be a link in the Navigation Bar). The main part of the website would be the GCI updates, including a countdown, and information about different tasks along with leaders. (this probably needs an API to pull data from). Below this would be **Posts**, where admins can post updates to the contest, similar to what @suthagar recently posted on the Talk. A sidebar to the left would be the **Navigation Bar**, where different links to other parts of the website. This would include links to the mentor page, task reviews, GCI website itself, and OpenMRS website. As different pages are made those will also be added to the Navigation Bar. (This navigation bar can also be on the top). On the bottom would be the **Footer**, where all the links to the Telegram Chat, OpenMRS Talk, and copyright info would be, along with contact info.

User Flow

GCI Student

- A regular GCI student would mainly be checking the home page’s live updates, where it shows information about tasks (popularity, etc) and a timeline for the contest. The student may choose to read reviews in the “reviews” section for certain tasks and write their own reviews for tasks that they have completed. They also can read posts (updates) made by admins regarding the contest.

Mentor

- Mentors can also take advantage of the live updates page- they can see which tasks might need more instances. Similarly, they can review feedback left by students in the “reviews” section and discuss with other mentors how they could make the task better. They can post updates to everyone regarding the contest as well.

Newbie

- Newbies can take advantage of the Getting Started section. There, they would learn all about how to start contributing to OpenMRS. This would include information such as registering account with GCI, account for OpenMRS, getting started with Telegram, etc. Then they can become a full fledged GCI student.

Quick Mock up (see above bulleted list & explanation for full details)

<p>Navigation Bar</p> <p>(This is where the links would go to different parts of the website and outside sites like GCI)</p>	<div data-bbox="431 338 1414 663"><p>OpenMRS Logo + GCI Logo</p><p>Mission Statement</p><p>About GCI + OpenMRS blurb</p><p>Getting Started (This could be in navigation bar)</p></div> <div data-bbox="431 680 1414 1056"><p>GCI Live Information</p><ul style="list-style-type: none">- Countdown- Task info- Leaders- etc.</div> <div data-bbox="431 1094 1414 1163"><p>Posts (Updates)</p></div> <div data-bbox="431 1201 1414 1270"><p>Footer</p></div>
